JABRA GN2000 MONO USB OC

FOR MICROSOFT® OFFICE COMMUNICATOR

DATASHEET

WIDEBAND VOIP FOR SUPERB CALL CLARITY.

The Jabra GN2000 MONO USB headset allows users to experience the true wideband sound of Microsoft® Office Communicator 2007. It also adds hands-free advantages, flexible use for both left and right ear and is completely plug-and-play with Office Communicator 2007.

VOIP WITH SUPERB CALL CLARITY

A headset used in a real-time VoIP or video call has a significant impact on the quality of the call. The Jabra GN2000 MONO USB headset will enhance your experience with Microsoft® Office Communicator 2007 by providing full wideband audio capability.

While other so-called "wideband" headsets cut-off around 4,000 Hz, the Jabra GN2000 MONO USB headset provides a full frequency response up to 6,800 Hz for optimum call clarity resulting in significantly less need to ask customers to repeat themselves.

The Jabra GN2000 MONO USB headset is fully compliant with TIA-920 specifications for wideband digital sound and features a noise-cancelling microphone for the noisy environment along with PeakStop™ technology, which eliminates sudden loud noises above 118 dB SPL.

ENHANCED EXPERIENCE – EASE OF USE

The Jabra GN2000 MONO USB for Microsoft® Office Communicator 2007 is a true plug-and-play solution. Much simpler than a handset or desk phone, the Jabra GN2000 MONO USB headset has an in-line hook switch control to answer and end calls.

In-line volume controls adjust the headset speakers to a comfortable level and to mute the headset simply press the middle of the volume control.

The Jabra GN2000 MONO USB headset works with Microsoft® Office Communicator 2007 without requiring any additional software including drivers. Just plug and play.

GN Netcom is a world leader in innovative headset solutions. GN Netcom develops, manufactures and markets its products under the Jabra brand name.

JABRA GN2000 MONO USB OC

FOR MICROSOFT® OFFICE COMMUNICATOR

FEATURES & BENEFITS

FEATURE	BENEFIT

Rich, wideband sound: - Frequency range up to 6,800 Hz - Meets TIA-920 standard for genuine wideband response	Optimum call clarity – Up to 70% more range than other so-called "wideband" headsets
Noise-Cancelling Microphone	Reduces background noise from the office enviroment for clearer calls
PeakStop™ technology – max. 118 dB SPL (RMS)* according to UL 60950 standards	Protection against sudden, loud sounds coming across the telephone network
Compatibility	The GN2000 MONO USB is compatible with: PC/Macintosh, Microsoft® Windows. The headset is a true plug and play solution and works as a USB audio device using Windows native drivers

* Sound Pressure Level (Root Mean Square)

SAFETY

The GN2000 Series meets the electric strength test and impulse test requirements of the international standard IEC 60950-1. It also meets EN 60950, AS/NZS3260, and UL 60950 standards.

DESIGNED TO PERFORM. BUILT TO LAST.

Discover the exceptional comfort of an ergonomically designed headset for professional use.

The Jabra GN2000 MONO USB is based on technology from the Jabra GN2000 series, which has proven its worth in offices and Contact Centres all over the world.

Pivoting leatherette ear cushions provide exceptional comfort and automatically adjust to the shape and angle of individual ears. The leatherette ear cushions also provide better acoustical coupling, ensuring a rich incoming signal.

Jabra headsets are made of impact-resistant materials that are strong and resilient to keep the headset firmly, yet comfortably in place throughout the workday.

SYSTEM REQUIREMENTS

The Jabra GN2000 MONO USB headset works with Microsoft® Office Communicator 2007 without requiring any additional software including drivers. Just plug the headset into your PC USB port.
